Note Declares That Soldiers of the United States Are In Mexico Without Consent of Mexican Government

ACT CAN ONLY BE CONSIDERED AN INVASION

Note Points Out That Much of the Trouble in Mexico is Due to the Attitude of the United States in Not Punishing Conspirators in the United States Who Plotted the Downfall of the Constitutionalist Government and in Refusing to Permit Shipment of Arms and Ammunition Into Mexico - Note Concludes Thus: "The Mexican Government Therefore Invites the United States to Bring to an End This Unsupportable Situation and to Support Its Protestations and Declarations of Friendship by an Immediate Withdrawal of the American Troops."

Mexico City, May 31.—Claiming that the American troops after the villa the words and protests of the United raid at Columbus, the note insists that States have been entirely in contradic-tion of their acts, and that in spite of eral Scott and General Funston antion of their acts, and that in spite of protests not to intervene in the affairs of Mexico, soldiers of the United ary line, thus violating all the precepts of the Mexican government.

In contradiction of the words of Gentary and Scott and General Funston another expedition crossed the boundary line, thus violating all the precepts of international law and committies an act of invasion. and in violation of Mexico's sove-reignty, the Mexican government now asks for the immediate withdrawal of those troops. The request is made in a 12,000-word note made public at the foreign office today about noon.

The note recites that American troops crossed the frontier after the Columbus incident without the permission of the Mexican government The act was not considered one of invasion then solely because the United States said they had misinterpreted the attitude of the Mexican government. When the second expedition crossed the line after the Glenn Springs incident, the note maintains, the plea that this was done with the consent of the Mexican consul at Del Rio, Tex., is untenable and that act can only be considered as one of in-

"The Mexican government therefore invites the United States to bring to end this unsupportable situation," the note concludes, "and to support its protestations and declarations of frinedship by an immediate withdraw-al of the American troops."

Washington Must Declare Itself. Maintaining that the protests of protests of friendship by the United non-intervention have been contra-dicted by the acts of the Washington government, the note says the time has arrived when Washington must re-clare itself clearly and unequivocally as to its future intentions

the Columbus raid is now over. But in spite of this fact, American troops still remain on Mexican soil. To con-tend that political disorder in this country justifies this act of the American military forces is in conflict with the repeated professions of the Washington government relative to non-in-terference."

Refers to Embargo on Arms. The note points out that much of the trouble in Mexico is due "to the attitude of the United States in not punishing conspirators is the United States, who have plotted the downfall of the present constitutionalist government and to the acts of Washington in refusing the shipments of arms and ammunition to enter Mexico." The Note in Part.

The note, which is addressed to Secretary Lansing, reads in part as follows:

Of the 2,446 delegates not more than 1,80 voted, it was asserted. The small vote was ascribed to the fact that many of the delegates from the west and middle west left last night for their homes while others refrained from voting because of warm per-sonal friendship for both candidates. The polls were open from 8 o'ciock until 4. Precautions were taken by the local blennial board to prevent electioneering in or about the armory where the convention sessions are held and as a result workers for the op-posing candidates were forced to talk to prospective voters either in the street in front of the armory or in the corridors of their hotels.
